

# Intervention card

What are you going to do, and how does it relate to your strategy?

## Do

### 1. Title

- Pick a simple name for this intervention.

### 2. Strategy

- Copy these from your strategy-map.
- What approach will this intervention execute?
- What challenge should it overcome?

### 3. Scenario

- What are you going to do?
- Describe or draw how you are going to use prototypes and roles and what different interactions could take place.

### 4. Scenario-checklist

Before you enter the field, make sure your intervention is clear. See the other side for a checklist.

3

### **A. Roles**

- You will be interacting with people, it is important to have a clear and convincing story. Who will you be? What will you do, and what are your motivations to do so?
- Practice your scenario before you go out in the field.

### **B. Prototype**

- What are your prototypes? How will people perceive them, how do they fit their context?
- In what way is your prototype flexible, what parts can you alter to pivot between scenarios?

### **C. Sensor**

- How will you record the way people respond to your intervention? What will it tell you about your approach?
- Take lots of notes/pictures or record audio/video, make sure it fits your scenario well.
